## 4. FIRST AID MEASURES

### First Aid Procedures

<b>Eye</b>	Flush eyes with water for 15 minutes or until irritation subsides. Seek medical attention if irritation develops and persists.
<b>Skin</b>	Wash contact areas with soap and water. Seek medical attention if irritation develops and persists. May contribute to acne/folliculitis.
<b>Inhalation</b>	Remove afflicted to fresh air. Call a poison center or a doctor/physician if breathing problems occur.
<b>Ingestion</b>	Immediately call a poison center or doctor/physician. Do not induce vomiting.

### Notes to Physician:

In case of ingestion, do not induce vomiting. If spontaneous vomiting occurs, keep head below hips to prevent aspiration. If any of the following conditions occur within the next 6 hours, transport to the nearest medical facility: fever greater than 101 °F (38.3 °C), shortness of breath, chest congestion, continuous coughing/wheezing. The onset of respiratory symptoms may be delayed for several hours after exposure. Local necrosis is evidenced by delayed onset of pain and tissue damage a few hours following injection.

### General Advice:

If you feel unwell, seek medical advice (show the label where possible). Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves. Discard any shoes or clothing items that cannot be decontaminated.

## 5. FIRE-FIGHTING MEASURES

### Flammable Properties:

Not flammable by OSHA criteria, but will combust.  
Exposure to fire may cause sealed containers to rupture/explode.

### Extinguishing Media

<b>Suitable Extinguishing Media:</b>	Carbon dioxide, dry chemical, foam, low pressure water fog.
<b>Unsuitable Extinguishing Media:</b>	High pressure water jet will intensify flame.

### Protection of Firefighters

<b>Specific Hazards:</b>	Complete combustion will yield carbon dioxide and/or carbon monoxide including a complex mixture of solid/liquid incomplete combustion particulates. Firefighters must use standard protective equipment including flame retardant coat, helmet with face shield, gloves, rubber boots, and in enclosed spaces, SCBA. Structural firefighters' protective clothing will only provide limited protection.
--------------------------	---

### Precautions/Protective Equipment:

In case of fire and/or explosion do not breathe fumes. In the event of fire, cool containers with water spray. Fire may cause pressurization of sealed containers which may rupture or explode. Keep run-off water out of sewers and water sources. Dike for water control.

### Fire Fighting Equipment/Instructions:

### Specific Methods:

Cool containers with water spray. Maintain distance if sealed containers are exposed to flame.

### Hazardous Combustion Products:

Carbon dioxide and carbon monoxide.

## 6. ACCIDENTAL RELEASE MEASURES

---

---

**Personal Precautions:** Keep unnecessary personnel away. Ventilate closed spaces before entering them. Do not touch or walk through spilled material.

**Environmental Precautions:** Runoff or release to sewer, waterway, or ground is forbidden.

**Methods for containment:** Dike far ahead of spill for later disposal. Use of an absorbent material to collect runoff is recommended. Collect and dispose of spillage as indicated in section 13 of this SDS. Never return spills in original containers for re-use.

---

---

## 7. HANDLING AND STORAGE

---

---

**Handling:** Use local exhaust ventilation if there is risk of inhalation. Avoid prolonged and/or repeated contact with skin. Avoid inhaling vapor/mist. Wear protective clothing to minimize skin/eye exposure to liquids/vapors/mists.

**Storage:** Keep container tightly sealed and in a cool, well-ventilated area. Prevent electrostatic build-up by using common bonding and grounding techniques. Store in a well-ventilated place. Keep the container tightly closed and dry. Keep out of the reach of children.
